Short-Term Investments That Are Safe

Satisfactory short-term investments in the shape of stocks and bonds are not readily found. Most of the choice securities have a number of years to run.

However, there is one security that we can recommend without any reservation whatever to those having funds for short-term investment—our interest-bearing Certificates of Deposit.

Any amount from $1.00 up can be invested with the assurance of absolute safety and for such time as is desired. They will be found just as satisfactory for long-term as for short-term investment.

You are invited to call on us for full details.

One-fourth of the wheat we grow is the result of the researches of the Government. After years of untiring experiment and investigation, the Government, through the Department of Agriculture, was enabled to introduce into this country the remarkable Durum wheat through which our production has been increased fully twenty-five per cent. This has been only one of many surprising but little-known accomplishments of the Government, which are covered in the interesting series of stories for which we have the exclusive right of distribution in this community.

We'll send this literature to you each month without obligation on your part if you will ask for it.

PINE STUMPS WORTH MONEY

Those Left in Cut-Over Lands Are in Demand—Yield Many Valuable Products.

Increased demand for naval stores and a slight falling off in the supply have together called attention to the value of the stumps left in the fields in cut-over lands of the south. A Washington letter of July 6 told of the result of investigation by Clement S. Ucker, vice president of the southern settlement and development organization, in the South Atlantic states, from which he learned that the stumps left in the fields do not die with the cutting down of the tree, but, on the contrary, continue to draw from the soil sap rich with the elements of naval stores.

From these old stumps may be distilled some twenty or twenty-five different by-products, including rosin, turpentine, pine and other oils, acetate, tar, pitch, alcohol and others. By one process rosin and paper pulp may be procured. Other processes leave a residue of valuable charcoal. It seems that the destruction by fire of these stumps in the clearing up of the land is uneconomical. They can be sold for enough to pay for the clearing and leave a surplus, so that we may yet see manufacturers of naval stores bargaining with the owners of cut-over land for the stumps upon it and extracting them themselves.

GIVE COLOR TO LANDSCAPE

Though the Daisies Grow Like Weeds, They Have a Beauty Too Little Appreciated.

They lift their heads to heaven, seeking to mingle with the stars—millions of them, scattered in wild profusion over meadow and pasture land. Men walk on them, tramp them down—but they rise again, serene, confident, searching the light which gives them life.

Daisies! Our fields are full of them. From afar their white heads give color to the landscape. Their yellow centered blossoms, blown by the wind, wave obeisance to the day and, by their graceful beckoning, invite us to take them home.

Daisies! Our empty vases call for them; our umbrella stands, our jardinieres, yearn for their beautiful blooms. And they are so near to us, so easy to get, that it seems a pity to waste their beauty in an unfrequented field.

Get them for the house, for the office, to wear. Even though like weeds they grow, God's love shines from their faces and blesses the corner they fill. —Toledo Blade.

Huns Polluted Interned Ships.

The condition of the interned ships, after their German custodians had left, was something indescribable; they reflected great discredit upon German seamanship, for it would have been impossible for any people which really loved ships to permit them to deteriorate as had these vessels and to become such cesspools of filth, says Rear-Admiral William S. Sims in the World's Work for July.

For three years the Germans had evidently made no attempt to clean them; the sanitary conditions were so bad that our workmen could not sleep on board, but had to have sleeping quarters near the docks; they spent weeks scrubbing, scraping and disinfecting, in a finally successful effort to make the ships suitable habitations for human beings.
